Education

University of London (UOL) , Singapore Institute of Management Oct 2022 — Jan 2026
Bachelor of Science in Computer Science

Experience

Mobile React Native Developer Dec 2025 — Mar 2026
Hiddentao Labs

- Implemented **CI/CD pipelines** using **GitHub Actions** and **Fastlane**, automating iOS and Android builds and distributing **test builds** via **Firebase App Distribution** — replacing a fully manual build-and-release process.
- Led cross-platform mobile development using **React Native** and **Expo**, delivering production-ready components across iOS and Android.
- Implemented automated code quality checks with **linting**, **type checking**, and **pre-commit hooks** across the development workflow.

Frontend Developer Intern Jan 2025 — Apr 2025
RiverValley Irregulars

- Designed and prototyped** responsive UI components in **Figma** and **Angular**, contributing to form implementation and layout improvements.
- Collaborated with developers to align UI designs with existing codebase standards and improve implementation feasibility.

Frontend Developer Intern Nov 2024 — Dec 2024
El Pando

- Assisted developers in the **final stages of a client project**, focusing on **data migration and validation** for deployment.
- Helped update and maintain **technical documentation** to support system handover to the client (ITE).

Projects

Miko — AI-Powered Collaboration Bot / TypeScript, Bun, Claude API Mar 2026 — Present

- Built **Telegram bot** integrating **Claude AI** for automated **GitHub repo analysis**, market research, and job preparation workflows.
- Implemented smart **intent routing** that classifies natural language messages and delegates to specialized command handlers.
- Orchestrated parallel API calls across **Claude API**, **GitHub API**, and **Brave Search API** for real-time data enrichment.

Tito — Time Tracking App / React Native, Expo, Supabase Oct 2025 — Dec 2025

- Built time tracking app for hourly workers with clock-in/out, break tracking, and automated wage calculation.
- Integrated **Supabase** and REST endpoints for data persistence and authentication.

Flipzi — Flashcard Study App / React Native, Expo, OpenAI API Apr 2025 — Sep 2025

- Built flashcard app with **spaced repetition** and confidence-based review scheduling.
- Integrated **OpenAI API** for AI-assisted deck generation from topic descriptions.

Skills

Languages: TypeScript, JavaScript, Python, SQL

Infrastructure: GitHub Actions (CI/CD), Firebase, Fastlane

APIs & Integration: Claude API, OpenAI API, GitHub API, Brave Search API

Databases: PostgreSQL, GraphQL, Supabase | **Frontend:** React, React Native, Angular, Expo
